

## Get your medical records in one, secure digital file with **Medical Records eSummary.**

When you have a complex medical history, or would like your history in one file so you can take it with you when you see a doctor, Teladoc can help. We can collect up to three years of your history and conveniently send you a secure digital file. Along with your file, one of our associate physicians will review your records and provide you with a health alert summary, bringing up any potential health concerns to your attention.

A member is entitled to access the Medical Records eSummary service once per year.

Receive your medical records in a secure file that our medical records coordinator team collects and sends to you

Take your medical history digital summary with you when seeing a new doctor, traveling, or moving

Receive an alert on any potential concerns from one of our associate physicians

## How it works:

Give us a call and our member service specialist team will get you to sign a consent form allowing us to collect your medical records on your behalf. We'll stay in contact with you to update you on our progress and make sure you received the file.
