## ***PBS WebUI Currently Incompatible with Internet Explorer 11***

The current version of the PBS WebUI (the old interface) has a bug that makes it incompatible with Internet Explorer 11. Due to this bug, the WebUI will not display calendars used for date selection in options such as “Prefer Off” when used in IE 11.

The WebUI is still fully functional using either the Safari (Mac), Mobile Safari (iOS), Chrome (iOS or PC) or Firefox (PC) browsers. **Unfortunately, the only browser available in Delta Crew Lounges is IE 11.**

**If you wish to bid on the computers in Delta Crew Lounges, please note the following:**

- You will have to use the PBS WebApp (the new interface).
- The PBS WebApp is available at the following address: [https:// dalpbs.navblue.aero/webapp](https://dalpbs.navblue.aero/webapp)
- The PBS Reference Handbook discusses how to use the WebApp in detail. It can be found on your EFB in the ALPA folder of AeroDocs.

The PBS Committee has been working with NAVBLUE to correct this bug as expeditiously as possible. The next version of PBS, which we anticipate using for March or April bidding, has fixed this bug

As always, feel free to email the PBS Committee with any questions or comments at [DALPBS@alpa.org](mailto:DALPBS@alpa.org).
