## LASER ILLUMINATION OF AIRCRAFT: A GROWING THREAT

**OCTOBER 27, 2011  
WASHINGTON HILTON  
WASHINGTON, DC**

Shining lasers into aircraft flight decks is dangerous and illegal. But, the number of incidents has doubled in recent years. This conference, sponsored by the Air Line Pilots Association, Int'l and the Air Transport Association, should not be missed by anyone who wants to know more about this outbreak and what is being done to address it.

AIR TRANSPORT ASSOCIATION
